

Elkin Enoc Mola Vides

Economist | Economic Data Analyst

📍 Cali, Colombia | ✉ molaelkin1@gmail.com | 🔗 LinkedIn | 🐙 GitHub

Professional Profile

I am an economist focused on data analytics and *machine learning*, with a solid background in economic theory, econometrics, and quantitative methods. I bring experience in applied research and economic analysis for the public sector, specializing in process automation, data cleaning, and the consolidation of large datasets from multiple sources. I also focus on statistical modeling and creating control dashboards to support evidence-based decision-making. As an Economics Master's student, I combine the rigor of classical economic analysis with advanced technical skills to process, model, and visualize information using tools such as Python, R Studio, SQL, Markdown, and Power BI. I excel at writing technical reports on economic trends and communicating complex findings clearly to diverse audiences.

Work Experience

2023 - Present	Superintendencia de la Economía Solidaria, Bogotá D.C. Economic Data Analyst. • Workflow automation of data processing and efficient migration to repositories in R, ensuring the replicability of institutional statistics and solidarity economy indicators. • Data consolidation and structuring of datasets by integrating multiple economic and social information sources (IPM, Census, RUES, Superfinanciera) for the financial analysis of supervised entities. • Dashboard design and implementation in Power BI, optimizing metric visualization and the delivery of official statistical information for internal and external economic supervision requirements. • Report generation and technical reports using Markdown format, streamlining analytical inputs required for decision-making in sectoral policy and regulation.
2022 - 2023	Gestión del Desarrollo Territorial Sostenible S.A.S., Magdalena Economic Researcher. • Socioeconomic characterization and supply chain analysis of fruits and vegetables in the municipalities of Guamal, Pivijay, and Zona Bananera, providing agricultural economics insights to the sustainable agriculture project. • Instrument design for primary data collection in the field, ensuring the consistency and integrity of subsequent statistical analyses. • Financial analysis development for project stakeholders and drafting technical reports that supported post-COVID-19 economic recovery and food security plans.

Education

2025 - Present	Faculty of Economic and Administrative Sciences, Universidad Icesi, Cali - Colombia. Master's Degree in Economics.
----------------	--

2017 - 2022	Faculty of Business and Economic Sciences, Universidad del Magdalena, Colombia. Bachelor's Degree in Economics.
-------------	---
