

# Elkin Enoc Mola Vides

Economist | Economic Data Analyst

📍 Cali, Colombia | ✉ molaelkin1@gmail.com | 🔗 LinkedIn | 🐙 GitHub

## Professional Profile

Economist focused on data analytics and *machine learning*, with a solid background in economic theory, econometrics, and quantitative methods. Experienced in applied research and economic analysis for the public sector, focusing on process automation, data cleaning, and the consolidation of large datasets from multiple sources, as well as statistical modeling and creating control dashboards to support evidence-based decision-making. As an Economics Master's student, I combine the rigor of classical economic analysis with advanced technical skills for processing, modeling, and visualizing information using tools such as Python, R Studio, SQL, Markdown, and Power BI. Highly capable of writing technical reports on economic trends and communicating complex findings clearly to diverse audiences.

## Work Experience

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
